

SMARTMASTER SOLO

STAND-ALONE SMARTCARD CONTROLLED ELECTRICITY AND WATER SERVICES

SmartMaster Solo is a highly reliable and cost effective pre-payment solution which can be incorporated into any of our pedestal ranges.

Designed to work as an individual, stand-alone system, SmartMaster Solo service pedestals can be installed without the need for any communications cabling or network management systems - simply connect your incoming cable and water pipe and it's ready to use.

Product Details:

- Uses contactless, re-useable RFID Smartcards
- Card reader and user display at every berth
- Pedestal display shows service outlet and card credit values
- Measures exact electricity and water values consumed
- Operation and maintenance manual with every order
- Two way communication allows transfer of credit from Smartcard to pedestal and refund of unused credit from pedestal to Smartcard
- 16amp to 250amp electrical supplies
- Single phase and three phase supplies
- ½" to 1" water supplies

Can Be Extended To Incorporate:

- Marina access gate control
- Sanitation pump-out control
- Fuel payment
- Retail payments
- Night-watchmen check-in points
